OBJECTIVE

Enthusiastic web developer with ten months of Professional Experience in Front-end Development. I aspire for a challenging position in a professional organization where I can enhance my skills and strengthen them in conjunction with organizational goals.

WORK EXPERIENCE

Konfhub Technologies

Full Stack Developer

(September 2020 - July 2021)

I have developed different communication dashboards in front-end and integrated API's to communicate with bulk number of relevant people at a time through Email, SMS, WhatsApp.

I have experienced with JIRA and GITLAB for all of our deployments

I have designed different types of Email, SMS, WhatsApp templates to send it to the relevant attendees and to provided a dynamic mail system from the platform.

I have worked on making a static site into a dynamic one by integrating the API's and displaying the data in proper format

I have worked on adding server side pagination to a data table to minimize the load on API requests

Tech Stack that I have come across while working on the projects : HTML5, CSS3, SASS, BOOTSTRAP, BULMA, JAVASCRIPT, JQUERY, REACT, GIT, GITLAB, JIRA

I have taken part in the migration of our API's and integrated them successfully thus improving our application performance and speed by fetching only the relevant data that is required

EDUCATION

Sri Venkateswara College Of Engineering & Technology

Bachelor of Technology Computer Science & Engineering

(August 2016 - July 2020)

7.2

I am a hard working engineering graduate specialized in computer science engineering with a overall CGPA of 7.2. I have attended different workshops like Amazon Web Services and Python that are conducted in our college which gave me a basic overview on cloud and the python programming language. I have given a seminar on GiFI technology. I have participated in different coding challenges that are conducted in our college over different semesters.

ACADEMIC PROJECT

IMPLEMENTATION OF DYNAMIC WEBSITE FOR SVCET

(December 2019 - June 2020)

This project based on DYNAMIC WEB DESIGNING CONCEPT. It is implemented through a content management system called WordPress. The main motivation of this project is to initiate the fact that in order to design a flexible and responsive website we do not need to write or modify pages of codes. In this project we replaced all the deprecated and broken plugins with the alternate ones. We made this project responsive by using plugins like Elementor so that it will be easy for any one to access it over mobile. We also added notes sections which will be available for the ease of students and introduced an online attendance updating system.
